

Foundatia Technologies™ Backup and Storage Management Solutions

Reduce costs and improve availability and security of critical data with Foundatia Technologies Backup and Storage Management Solutions

Today, organizations are facing an explosion in business data volume at an accelerating pace. Data, which is the core to any business, is invaluable and cannot afford to be lost. Therefore, it is vital for organizations to have a proactive backup and recovery strategy, and Foundatia Technologies can provide you with enterprise-class solutions for protecting your mission critical data.

Foundatia Technologies has the most comprehensive and scalable suite of backup and storage management solutions. From fully managed data protection to application recovery services, Foundatia Technologies provides continuous data protection for all your critical business information. Our service offerings include backing up data on-site to disk and tape, rotating tapes and managing your backup library, replicating data as well as backing up remote data online.

Regardless of the magnitude of data involved, we help ensure that all of an organizations critical data is protected efficiently and can be quickly recovered, down to an individual e-mail or document. Offering installation, configuration and customization of your backup software, our service can significantly improve system recovery time and data availability, reduce bandwidth and satisfy most regulatory requirements. With Foundatia Technologies' solutions, rest assured your data will receive unlimited protection at a limited cost.
