

Foundatia Technologies™ Hosting Services

Provide offsite hosting for your mission-critical servers and data with Foundatia Technologies state-of-the-art, enterprise-class hosting facilities

By storing your IT assets inside Foundatia Technologies' partner hosting facilities, you can achieve your business growth objectives and improve your IT performance, all at a lower total cost of ownership. We offer redundant power and bandwidth to a variety of organizations, and our 24x7x365 environment can help to protect all your mission-critical data. Catering to businesses of all sizes which require the advantages of a secure and reliable data center, our services assist you with meeting all your compliance guidelines, from HIPAA to PCI to SAS 70 and more.

Due to the redundant nature of telecommunications infrastructure, organizations can benefit from a reliable and secure environment that enables them to easily locate network-accessible items. Foundatia Technologies' facilities provide this type of environment, utilizing fiber-optic networks. Internet connectivity is delivered on a gigabit backbone employing routers and switches, with a high availability configuration to several Tier 1 carriers. Our state-of-the-art facilities provide you with the high availability you require for your sensitive data and mission-critical applications.

Foundatia Technologies' infrastructure and network security systems are monitored and staffed 24x7x365 for availability, traffic trending, and irregular firewall activity and intrusion events. We offer physical or virtual environments and ensure 100% uptime and availability, including primary and secondary sites for disaster recovery.

Our comprehensive hosting solutions provide the highest level of support and service, allowing you to focus on your organization's core competencies. These services include:

- ✓ Enterprise-class infrastructure and state-of-the-art security
- ✓ Full-time expert engineering support
- ✓ SAS 70 Type II and PCI compliance
- ✓ Hoteling for small groups of servers
- ✓ Virtual hosting for critical components such as Web sites or e-mail systems
- ✓ Cold-, warm- or hot-site configurations for physical and virtual environments - disaster recovery
- ✓ Managed services including Network Security, Server Monitoring, Backups and more
