

Foundatia Technologies™ Managed Network Security Solutions

Protect your organization from increasing vulnerabilities with the high availability and security delivered by Foundatia Technologies Managed Network Security Solutions

Is your organization protected from Internet attacks, unauthorized access and viruses? Prevent internal and external threats with Foundatia Technologies Managed Network Security Solutions. Our state-of-the-art firewall is critical in mitigating the security risks inherent in any Internet connection and our solution provides strong protection to minimize vulnerabilities and protect your network. The added security your organization will receive from this solution can help give you the peace of mind necessary to safely focus on your core business, compliance and data security policies.

Why risk your firewall to an inexpensive unit purchased at the local computer store – or even worse, allowing inexperienced administrators to be responsible for complex environments such as Cisco or Watchguard? Firewall setup is critical to mitigating the security risk inherent to any Internet connection. Foundatia Technologies brings the experts and tools needed to properly establish and maintain a secure environment 24 x 7 x 365 days with full monitoring, administration, and support.

Foundatia Technologies Managed Network Security Solutions will monitor network connections, ensuring no dangers or threats are posed to your company's security or compliance. Ultimately, we can assist your organization in saving money and reducing risk by providing the expertise required to monitor and respond to threats any time of day, year-round. Take the necessary steps today to protect your business before damage occurs.

Offering fully comprehensive solutions — from managed network services to managed firewall and intrusion prevention, to content or spam filtering, vulnerability management, Virtual Private Network (VPN) services and more — Foundatia Technologies has the talent and tools necessary to properly establish and maintain a secure and compliant environment.
